Professional Summary

Emerging environmental data scientist and solutions-focused professional with a background in Computer Science, IT, and technical problem-solving, now pursuing a Professional Science Master's in Ecosystem Science and Sustainability at Colorado State University. Skilled in troubleshooting complex systems, data analysis, and project coordination, with hands-on experience in fieldwork, outdoor leadership, and natural resource management. Passionate about applying technical expertise and analytical thinking to water resource management, ecosystem monitoring, and conservation initiatives. Strong communicator and collaborator, committed to bridging technology and environmental science to support sustainable resource solutions.

Technical Toolkit:

- **Data Analysis & Modeling:** R, RStudio, Python, Excel, statistical analysis, visualization
- **Database & IT Skills:** SQL, Troubleshooting hardware/software, network systems, Active Directory, domain management
- **Field Methods:** GPS mapping, soil and vegetation surveys, ecological monitoring techniques

Natural Resource Experience

Mild to Wild Rafting | River Guide

Durango, CO | Summer 2025

- Collected observational data on water conditions and wildlife sightings, contributing to informal monitoring and client education.
- Delivered engaging interpretive talks on local ecology, geology, wildlife, and regional history to enhance client experience and environmental awareness.
- Managed risk by conducting thorough safety briefings, monitoring river conditions, and responding to on-water incidents.
- Collaborated with team members to coordinate gear preparation, transportation logistics, and client support.
- Built strong rapport with clients, consistently receiving positive feedback and tips for professionalism, enthusiasm, and in-depth knowledge of the area.

City of Fort Collins | Parks Maintenance

Fort Collins, CO | 5/2019 - 01/2022

- Conducted hands-on maintenance of natural areas, trails, and facilities, ensuring safe and accessible environments for the community while gaining experience working in varied field conditions.
- Monitored conditions of public lands and natural resources, identifying hazards and implementing corrective measures.
- Installed, repaired, and maintained irrigation systems to ensure efficient water distribution across park landscapes.

IT and Energy Experience

Clear Perceptions | IT Technician

Fort Collins, CO | 12/2022 - 7/2024

Technical Support Analysis

- Collected and reviewed ticket logs, categorized problems by type, and analyzed trends using Excel allowing me to identify frequent system issues, enabling proactive maintenance that reduced repeat support requests and improved client satisfaction.

System Performance Monitoring

- Analyzed server logs and performance metrics during a migration project. Identified bottlenecks, optimized storage allocation, and monitored uptime in order to improve system efficiency and reliability.

Data Migration and Validation

- Managed migration of critical organizational data from physical servers to secure cloud environments, minimizing downtime and ensuring data integrity.
- Maintained detailed records of issues, resolutions, and inventory, improving asset management and compliance.

Skyline Solar | Solar Installer

Fort Collins, CO | 01/2022 - 12/2022

- Installed and maintained solar energy systems, requiring technical precision, troubleshooting, and safe handling of specialized equipment.
- Interpreted technical schematics and electrical layouts, ensuring proper system functionality and compliance with safety standards.
- Conducted on-site assessments in diverse outdoor conditions, applying field-based problem solving to meet client and project requirements.
- Documented installation processes and outcomes, supporting quality control and long-term system monitoring.

Education

Colorado State University – Fort Collins, CO

Professional Science Master's (PSM), Ecosystem Science and Sustainability (May 2026)

- Coursework: Ecosystem/Sustainability analysis, Environmental Data Analysis, Water Resource Management, GIS Applications.

Colorado State University – Fort Collins, CO

Bachelor of Science, Computer Science, 3.6 GPA, Minor: Mathematics (May 2021)
